About Me

Hi! I'm Jihwan Moon, a Ph.D. candidate at Seoul National University Vision and Learning Lab, advised by Prof. Gunhee Kim. My ultimate research goal is to make AI available to everyone at low or no cost. To this end, My current primary interests include, but not limited to, local (greedy block-wise) learning of LLM, decentralized learning, and learning to optimize. I was, and still am, interested in Multimodal AI, with emphasis on multimodal representation learning and data-centric multimodal learning.

Education

Seoul National University , Integrated M.S. & Ph.D. in Artificial Intelligence	Seoul, South Korea
• Advised by Professor Gunhee Kim • GPA: 4.12/4.3	Mar 2021 – Present
Seoul National University , B.S. in Economics	Seoul, South Korea
• Minor in Computer Science • GPA: 3.67/4.3	Mar 2013 – Feb 2021

Research & Work Experience

KC ML2 Research Resident	Seoul, South Korea
• Conducting research on local (greedy block-wise) learning for LLM pretraining and finetuning.	Jun 2026 – Present
LG AI Research Research Scientist Intern, Bio Intelligence Lab	Seoul, South Korea
• Conducted research on Vision Transformer token compression and pruning methods specialized for large image inputs.	Sep 2025 – Mar 2026
AI2 Research Collaborator	June 2024 – Feb 2025
• Worked with researchers in AI2 on online video-text data filtering research.	
Vision and Learning Lab, Seoul National University Undergraduate Research Intern	Seoul, South Korea
• Conducted research on finding optimal neural network block configuration for greedy block-wise (local) learning.	July 2020 – Feb 2021
Graduate Research Assistant	Mar 2021 – Present
• Conducted and led various research projects, topics including multimodal learning, online multimodal data filtering, and improving multimodal LLM using a multimodal knowledge base.	
Platfarm Inc. NLP / Deep Learning Engineer	Seoul, South Korea
• Worked on improving a sticker and emoji recommendation system using NLP and deep learning. • Participated in the EmotionGIF 2020 challenge and won 1st place.	June 2019 – Jan 2020

Publications

ReSpec: Relevance and Specificity Grounded Online Filtering for Learning on Video-Text Data Streams	CVPR 2025

Academic Activities

Reviewer

- Journal: TPAMI (2024, 2025)
- Conference: CVPR (2026), ECCV (2026), NeurIPS (2026)

Teaching Assistant (Seoul National University)

- Discrete Mathematics (Spring 2023)
- Theory and Lab of IoT, AI and Big Data (Fall 2022)
- Probabilistic Graphical Model (Spring 2022, Spring 2025)

Misc.

Programming: Python (PyTorch, TensorFlow), Java

Languages: Korean (Native), English (Fluent)
